Applicant:	MCKENZIE ET AL.	Examiner:	P. Brunovskis
Serial No.:	09/051,034	Group Art Unit:	1632
Filed:	03/31/98	Docket No.:	30562.6USWO
Title:	IMPROVED NUCLEIC ACIDS ENCODING A CHIMERIC GLYCOSYLTRANSFERASE		

RESPONSE TO RESTRICTION REQUIREMENT

Assistant Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

This letter is in response to the restriction Action dated December 23, 1999. In the restriction Action, the Examiner has established two separate Groups of claims; namely, Group I, claims 1-25 drawn to nucleic acids and methods of using such acids and Group II, claim 22 relating to a transgenic animal and organs thereof. Applicants elect, with traverse, Group I, claims 1-25.

Applicants object to the position of this restriction Action after the PCT application has had no such unity of invention issues raised previously. Further, Applicants assert that the logic of the Examiner is flawed. Applicants believe that the modified nucleic acids constitute a linking concept which unifies all claims and prevents imposition of any restriction logic. Lastly, no efficiency of searching is obtained by imposing this artificial distinction. Applicants assert that the case can be adequately searched by reviewing the appropriate subclasses for Group I.

Applicants respectfully request the Examiner to withdraw the restriction Action and to examine all claims 1-25.

Respectfully submitted,

19 Jan 00
